About

Final year Computer Science student at GEC Bharatpur (Rajasthan Technical University) and **aspiring Full-Stack Developer** with a practical, project-based approach to building web applications. Focused on developing core application logic using **Java** for backend functionality, while actively building responsive frontends with **ReactJS**. Technical foundation includes working with **SQL**, **HTML**, **CSS**, and **JavaScript** to connect and build functional web features. A dedicated, hands-on learner committed to improving coding practices, exploring new technologies, and growing technical capabilities within a collaborative software development team.

Education

Government Engineering College, Bharatpur <i>B. Tech in Computer Science and Engineering – 7.00</i>	2023 - 2027
St. Xavier School, Ballia <i>Secondary & Senior Secondary – 70%</i>	2021- 2023

Projects

1. **Library Management System** | *ReactJS, Java 25, Spring Boot, MySQL, Spring Security, Thymeleaf*
 - Developed a comprehensive platform to **automate library operations**, such as real-time book tracking, member registration, and inventory management using **Java 25**.
 - Implemented **Role-Based Security** (Admin/Student) and an **Automated Notification** scheduler that tracks overdue books and triggers email alerts via **JavaMailSender**.
 - Built a modern **Glassmorphism UI** with **Thymeleaf** featuring a smart fine calculation engine and a live statistics dashboard for library oversight.
2. **GroCart** | *ReactJS, Spring-Boot, Firebase, Java*
 - Engineered a **full-stack grocery e-commerce application** designed to provide a reactive and seamless mobile shopping experience using **Jetpack Compose**.
 - Integrated **Firebase** for secure cloud authentication and real-time database synchronization to manage user carts and product catalogs across devices.
 - Enhanced user utility with **GPS geocoding** for delivery addresses, predictive search, and an automated system for generating and downloading **PDF invoices**.

Technical Skills

Languages: Java, SQL, HTML, CSS, JavaScript
Frameworks & Libraries: *ReactJS*
Databases: MySQL
